HOW ZEROPOINT™ TECHNOLOGY IN THE VIBRANZ VIBRATIONAL MUSIC WORKS

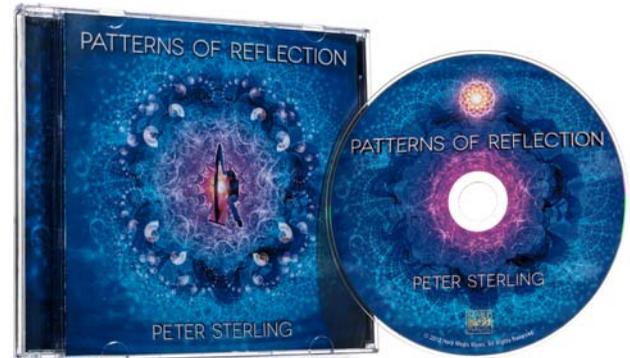

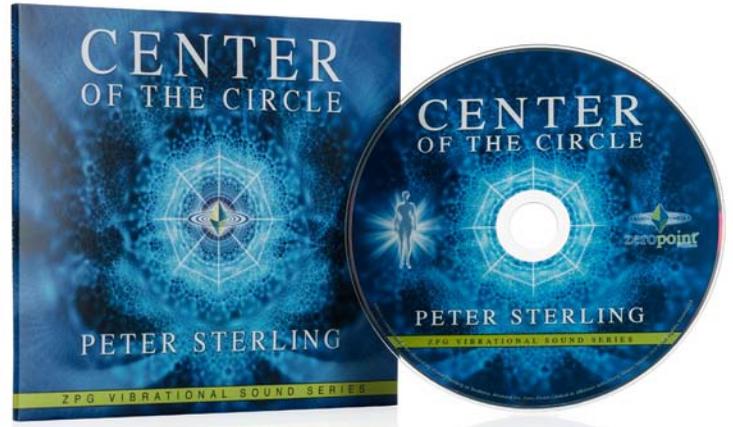

It has been discovered that the cells in the body vibrate at various frequencies depending on their state of health. Vibranz has identified specific frequencies that match the optimum state of health for each of the body's organs and systems. These are called Human Blueprint™ Frequencies. When you listen to Vibrational Music, your body begins to resonate with the frequencies that are in the music through a process called Sympathetic Resonance. This is similar to a tuning fork that will pick up the frequency (sound) of another tuning fork in its vicinity. When they are close to one another, they will both begin to resonate at the same frequency. When the organs and systems of the body are attuned with the frequencies that are in the Vibrational Music, the body returns to a balanced state. The body is able to protect and heal itself when it is in a state of perfect balance.

The 'field' around the body shows the symmetry between left and right sides of body. Symmetry is important for healthy function. The gaps or decreased energy relates to organs, glands or body parts. Note the stronger energy field after listening to "Center of the Circle".

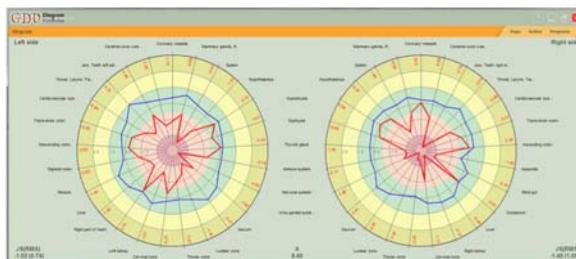

The Chakras (balls) are spinning vortexes of subtle energy and are crucial for everyday balance and wellness. The left, BEFORE scan, shows misalignment in some of the chakras and insufficient energy in the throat chakra. The circle shadows present are showing the other scan chakra positions. Note how the chakras are center aligned to support body function AFTER listening to "Center of the Circle".

VIBRANZ VIBRATIONAL MUSIC TESTIMONIALS

"My 11 year old daughter started middle school this year, and it has not been an easy transition. She had become quite sullen, and typically answered us in mono-syllables or an argument. When the Vibranz conference was in Delray, I offered to host a party, and Lorraine came over with one of Peter Sterling's CD's, so I played it during the party. My daughter was in and out that day, doing her own thing, and not really interacting too much at the party, but I noticed she was smiling more and seemed much lighter. The next morning, she came down for breakfast before school. I was already sitting at the kitchen table, and she sat down and just started talking with her old, bubbly, fun demeanor. She started telling me about the kids at school, both the good and the bad, and talked non-stop for about 10 minutes. Then she left for the bus. My husband that was sitting in the next room didn't say a word through this, and after she left, he said, 'Who was that child that looked like our daughter?' It was really a marked difference! I continue to play the music whenever possible, and I can always tell a difference if it isn't played." — Lisa L., FL
